

SAFETY RULES

in the electric and mechanical laboratory

*NUOVA SEDE
IPSTA Luigi SETTEMBRINI*

I.P.S.I.A LUIGI SETTEMBRINI

The vocational school
L. Settembrini is divided
in two departments:
MECHANICAL
ELECTRIC/ ELECTRONIC

The school offers the
possibility to get a
certificate after three
years or a diploma after
two more years

The aim of our vocational school is to teach the necessary competence to find a job easily.

We not only learn theoretical subjects, but we also have some practical lessons in the lab about safety rules

General safety rules

There are some general safety rules we must respect when we enter a lab because the lab is a working place and it is subject to the law no 626 about prevention and safety on work

Personal and general laboratory safety

- ◆ Never eat, drink, or smoke while working in the laboratory
- ◆ Read labels carefully
- ◆ Do not use any equipment unless you are trained and approved as a user by your supervisor
- ◆ Keep the work area clear of all materials except those needed for your work

Electrical safety

- Do not touch any electrical gear or conductor unless you have made sure that it is DEAD and EARTHED
- Do not use wires with poor insulation
- Do not touch any electrical circuit when your hands are wet
- Do not work on energized circuit without taking extra precaution such as the use of rubber gloves
- Do not throw water on live electrical equipment in cases of fire.
- Do not test circuit with bare fingers

Mechanical safety

- Wear safety glasses or face shields when working with hazardous materials and equipment

- Clothing: When handling dangerous substances, wear gloves, laboratory coats, and safety shield or glasses.

- If you have long hair or loose clothes, make sure it is tied back or confined.

Some important signs

These are some of the important signs we learn when we are in the lab

Safety rules learning

- ✿ Safety is taught both during theoretical and practical classes especially in the first two years
- ✿ The students of the 4th and 5th year have to follow some training courses run by experts of companies who teach them safety rules in working places
- ✿ A final test is given to the students to check what they have learnt and understood about safety

**This is the way
of teaching safety in our school**

Thank you for your attention
